Subject: ASAP NEPA Letter - please review
ASAP DSEIS Comments Draft 08212017.docx

Hi Mark,

Thanks for sharing the current version of your ASAP letter, and thanks for agreeing to help with OWOW requested revisions to mine. The attached is my current version – it contains a few comment bubbles with suggested edits from OWOW, that I would appreciate your help with addressing. In addition, if you have any overall observations or other edits to recommend to the letter, please share those as well. As you know, it was based off of your first version of the 404 comments, and hasn't been altered much to match the new course your comments have taken in the 3(a) letter. Therefore, it contains a lot of detailed comments that don't appear in your letter (unless there is an enclosure that I haven't seen). I think this is okay, as these are all valid comments to make under NEPA. But, it is important for the messages in our letters to align, so I want to be sure there isn't anything left in the NEPA letter that was deliberately taken out of the 404 letter, or anything new added to the 404 letter that needs to appear in the NEPA letter.

As you know, the deadline is approaching and there is a lot of internal review/coordination left to be done, so if you can get to this today, I would really appreciate it.

Thanks,

Molly
